

## Motivation

### Vocational training costs are high

- For a service company, a training day has high direct costs per employee.
- To train a master-degree student to work on an executive position in middle-management, the costs may well be in the order of hundreds of thousands euros.

### Companies have an interest to further increase education

- Less than half of all employees of European enterprises take part in further education offers.

### The Internet is full of valuable information, but there is "information overload"

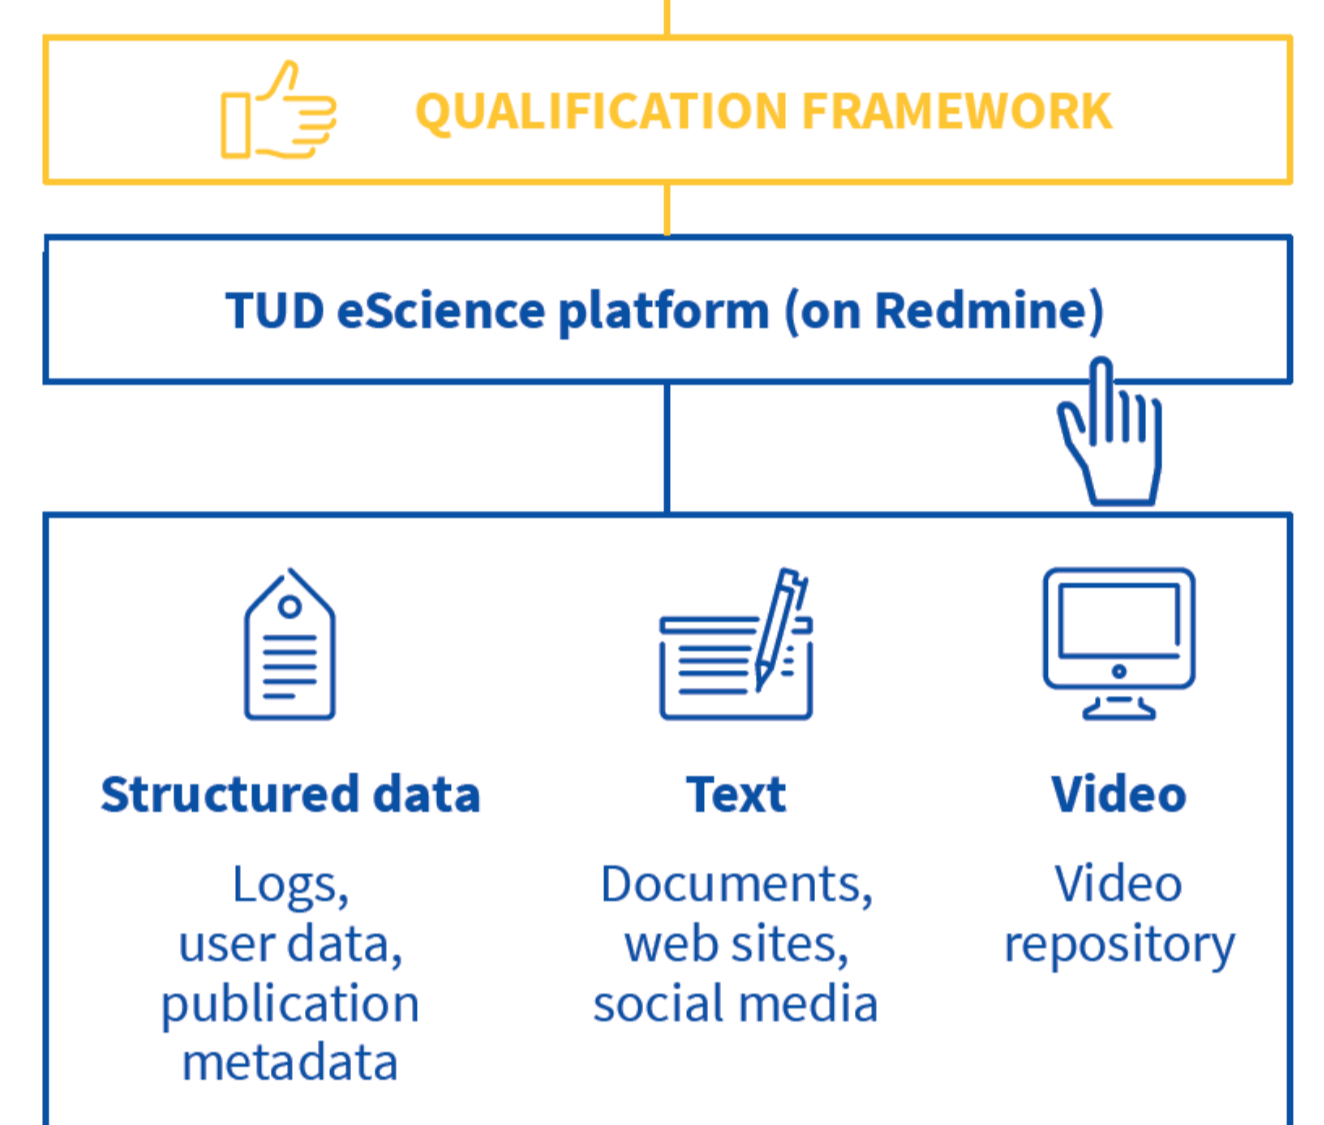

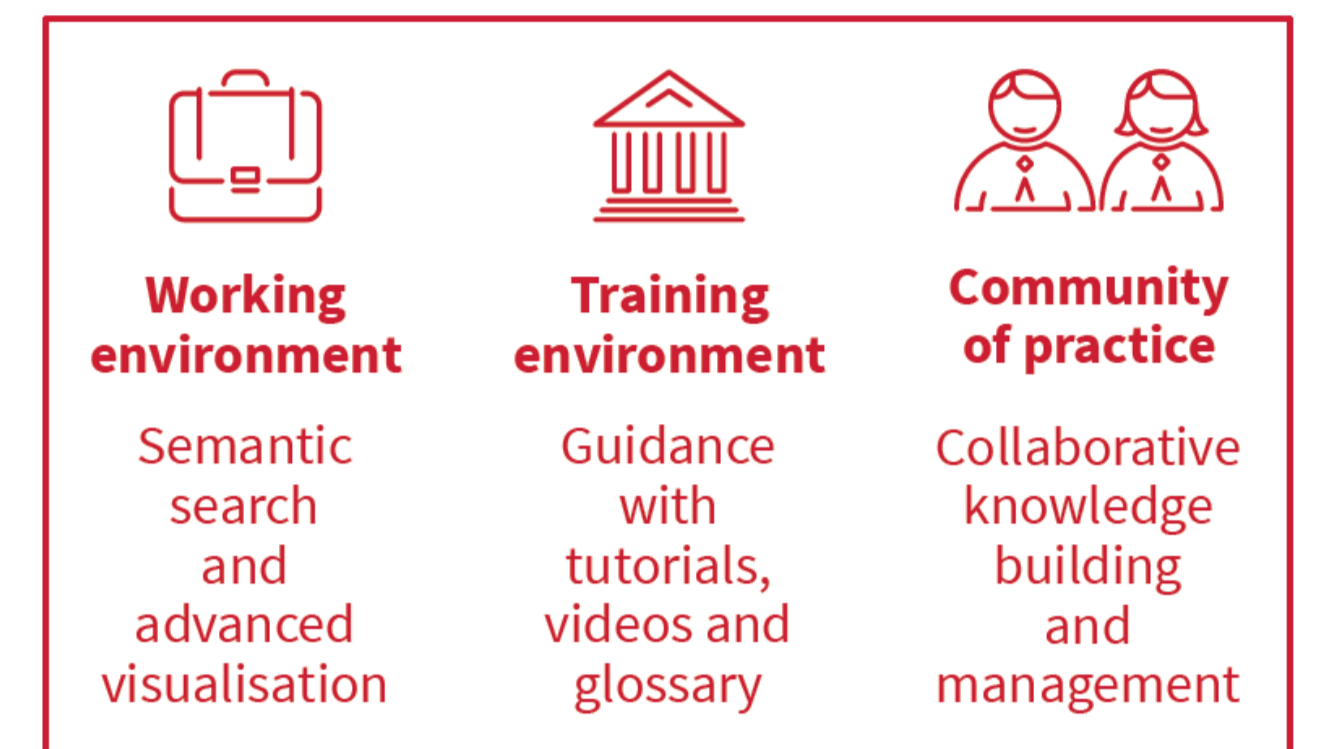

- Drift to majority; Loss of completeness; Decay of information.
- Global scientific output doubles every nine years.

→ Qualitative data analysis tools and techniques are necessary for taking advantage of the available information.

## Our approach

*MOVING builds an innovative training platform that enable users from all societal sectors (companies, universities, public administration) to fundamentally improve their information literacy by training how to choose, use and evaluate data mining methods in connection with their daily research tasks and to become data-savvy information professionals.*

You can access the MOVING platform for free at: [platform.moving-project.eu](http://platform.moving-project.eu)

## The MOVING platform

### Main search page

### Visualization functionalities

## Platform's features

Perform **scalable real-time** search and retrieve various kinds of documents (including web pages, scientific publications, videos).

**Filter and explore** search results through **network visualisations driven by the user interest**, to highlight relations among the documents and entities (authors, organisations etc.).

Become search experts using an **Adaptive Training Support** widget.

**Separate different authors** with the same name or **connect different versions** of the same document.

Perform **analytics** on search results, such as **time evolution of laws**, for use in professional services.

**Browse files stored locally**, to connect them to platform data.
