Make your research open!

Open and Collaborative Science requires a new set of skills and attitudes to enable young researchers to succeed. Therefore, we have developed the MOVING MOOC „**Science 2.0 and open research methods**“ at the TU Media Centre.

Don't study collaborative science alone!

In the MOOC (Massive Open Online Course) you can engage with other **young scholars** from around the world. We show you how to use social web technologies and online communities as a means of research: to build networks, to discuss findings and to collaborate with scholars across disciplinary, cultural and geographical boundaries. You will learn how the use of social technologies in the context of movements such as **Open Access, Open Data and Open Education** offers completely new opportunities to publish, share, discuss and reproduce scientific knowledge and data.

Register for the MOOC!

The MOOC starts **January 21st 2019** on the MOVING-Plattform (platform.moving-project.eu). The course will be held in English, is free of charge and is open to all interested people. For more information visit our Website and follow us on Twitter **@MoMoSci20**.
