MOVING PLATFORM OVERVIEW

QUALIFICATION FRAMEWORK

TUD eScience platform (on Redmine)

Structured data
- Logs, user data, publication metadata

Text
- Documents, web sites, social media

Video
- Video repository

Working environment
- Semantic search and advanced visualisation

Training environment
- Guidance with tutorials, videos and glossary

Community of practice
- Collaborative knowledge building and management

Funded by the European Union’s Horizon 2020 research and innovation programme under grant agreement No. 693092
The MOVING platform helps its users (such as students, scientists, professionals, public administrators) to improve their information literacy.

- Perform scalable real-time search and retrieve various kinds of documents (including web pages, scientific publications, lectures and videos).

- Use the concept graph visualization to gain insight into extracted entities and analyze the relationships between them.

- Train to become a search expert by using the “Learning-how-to-search” widget.

- Learn to become information literate by using the “Curriculum Reflection” widget.

- Separate different authors with the same name or connect different versions of the same document.

- Perform analytics on search results, such as detection and forecast of trending topics.

- Discover new interesting documents with the “Document Recommendation” widget.

- Upload new documents and identify related parties.

You can access the MOVING platform for free at platform.moving-project.eu
